1961-1974 Buick
Date Coded Spark Plug Wires

For those requiring the best for their show ready car, these reproduction wire sets are unsurpassed. They are manufactured to original GM blueprint specifications. They include the proper boots, terminals, script and correct factory length. All wires are carbon core for radio suppression. They come correctly identified with "Packard Radio TVRS" or "Radio GM" along with the proper date code to match your car.

Date codes will read as such: 3 Q 67. The first number, "3" corresponds to the third quarter of the year. "Q" means quarter. The last number, "67", is the year, 1967. Thus, a cable marked 3 Q 67 was produced in the third quarter of 1967. You should order your spark plug wire sets with dates that are 6 to 12 months prior to the manufacturing date of your car. Note: wires were not dated on vehicles prior to January 1961.

Carburetor
Rebuilding and
Restoration
Service (3.725)

Each carburetor is totally disassembled and cleaned in a hot tank solution. Then, each component is correctly plated, painted and colored to duplicate its original factory finish. The carburetor is reassembled using all proper gaskets, pumps, needles and seats, etc. and new correct screws. Finally, all bench adjustments are made to factory specs. This includes correct shimming of the start switch. The result, the best rebuilt and restored carburetor available in the Hobby. **NOTE:** This is not an area to skimp on your restoration. Demand the best!

Buick used two types of steering linkages from 1961-1975, Saginaw and Thompson (Alternate). Saginaw original equipment can be identified by having a plastic plate, or a small "s" stamped on the plate. (see illustration A) Saginaw Idler arm assemblies will typically be a three-piece unit having a threaded steel bushing (see illustration B). The Saginaw Idler Arm Assembly with the metal plug design is an integral unit with the bracket (see illustration C). Saginaw centerlinks have ball studs that measure .587 (see illustration D). Saginaw linkage has straight joints (see illustration E).

Thompson or Alternate original equipment can be identified by a plain metal cover plate under the ball stud of each socket (see illustration E). Thompson Idler Arm assemblies are a one piece unit (see illustration F). Thompson centerlinks have ball studs that measure .556 (see illustration G). Thompson linkage has tapered joints (see illustration H).

SHOP MANUALS: A Shop Manual is ESSENTIAL. This should be your very first purchase after buying your car. These fully illustrated books were originally developed by BUICK for trained BUICK mechanics. They offer in detail, description and analysis as well as maintenance and step by step overhaul procedures. All of our Shop Manuals are Full Size as originals and feature the clearest print and pictures available in a "xerox" type copy. The covers are "in color" and protected by a heavy clear plastic to keep them clean. As an additional feature, each manual is spiral bound in plastic for long lasting use.

OWNERS MANUALS: Originally placed in the glove compartment of each car. They contain a wealth of information on awareness, instruction and maintenance of your newly purchased car.

FISHER BODY MANUALS: These books are "Shop Manuals" for the Body of the car. Topics include Doors, Panels, Weatherstripping, Glass, Glass Channels and all interior.

CHASSIS AND BODY PARTS BOOKS:
These books were sent to BUICK dealership for their parts department staff to recognize and identify parts. The illustrations within, enable you to find the "group" and "part number" of each part - then identify.

All items listed below are quality copied from genuine Buick originals. They are provided as informative tools for restoration purposes.
